## **Hand Sanitizer**

**TAT**hen the pandemic spread worldwide, Extension responded to shortages of hand sanitizer and the reliability about "home remedies". The concern was some "recipes" contained unsafe components, risking other health maladies and harm to the user. Utilizing the linkages to other Extension systems, Guam 4-H Youth Development professionals quickly formatted a brochure and a self-directed teaching outline for youth to understand hand sanitizer basics, basic chemistry, and safe use by humans. You can learn more about this on our 4-H Extension website https://www.uog. edu/extension/4h#Activities-and-Resources. The importance of sanitization continues to be a concern for families, youth, and communities on Guam.

If you are interested in learning more about this program, reach out to our Extension Professionals below:
