Presentation Outline

- Fatima’s Story
- The Inclusive Faculty Framework
- Exploring the skills Domains
- Incorporating IFF into professional development

This material is based upon work supported by the National Science Foundation under Grant No. (1834518, 1834522, 1834510, 1834513, 1834526, 1834521).
Listen to Fatima’s Story
Are you prepared to help Fatima?
The National Change team of the Aspire Alliance has identified 
**Three Core Domains:** *Identity, Intercultural, and Relational,* 
which underlie inclusive practices in higher education.

The **Inclusive Faculty Framework** promotes student success by providing a set of skills in these three domains that can be applied to inclusive practices in teaching, research mentoring, advising, leadership, and colleagueship. These skills also contribute to health and well-being and inclusive climates within the institution.
Identity
Reflection on social identities of self and other builds:
• Awareness of one’s own perspectives, biases and privileges
• Understanding of others’ backgrounds and experiences
• Recognition of the impact of identity on professional success
• Supports more inclusivity toward students and colleagues in classrooms and other settings.

Relational/Communication
Engaging and communicating more effectively with students and colleagues promotes:
• Understanding and working with multiple perspectives and experiences
• Authentic interactions

Interculturalism
Moving beyond passive acceptance of different cultures and cultural identities addresses issues of equity by:
• Recognizing and respecting cultural differences
• Promoting productive dialogue and interaction between cultures

Inclusive Teaching
Inclusive Mentoring
Inclusive Advising
Inclusive Colleague

Incorporating IFF Into Faculty Professional Development

- Improving in these domains will help you in all of your roles as faculty
- Advising is very similar to teaching
  - What do you want your students to know, do, or value as a result of the academic advising relationship?
- Excellent advising can improve:
  - relationships with students in and out of the classroom
  - student engagement
A Guide to Academic Advising for STEM Faculty

This material is based upon work supported by the National Science Foundation under Grant No. (1834518, 1834522, 1834510, 1834513, 1834526, 1834521).

Faculty and academic advising: A focus on student learning

Dr. Sean Bridgen
Associate Director of External and Institutional Partnerships
NACADA: The Global Community for Academic Advising
Session Overview

• Why is academic advising important?
• How is academic advising similar to teaching?
• What is the relationship between student learning and academic advising?
• How do we think about student success?
• What are the foundational concepts and competencies that inform and inform learning-centered advising?
• How do technology and data influence advising practice?
• How do we center equity in academic advising?
“Learning transpires when a student makes sense of his or her overall curriculum just as it does when a person understands an individual course, and the former is every bit as important as the latter”

Lownstein, 2005
LIKE THE EXCELLENT TEACHER, THE EXCELLENT ACADEMIC ADVISOR

- Clarifies
- Challenges
- Supports
Philosophy of Advising

• What are the purposes of advising?

• Normative vs Descriptive Theories

• The identity of any system is defined by its behavior – Donella Meadows
“The very principles and practices that promote student retention (persistence) also promote student learning (academic achievement).”

(Cuseo & Farnum, 2011)
Persistence vs. Retention

- Retention is an institutional metric
- Persistence follows the student

(Hagedorn, 2006, Troxel, 2018)
Advisors Know

• How students are negotiating their institutions.
• Where the trouble spots are for students.
• Why students have come to the institution.
• When students are first thinking about leaving and what might be prompting this desire to leave.
• Why students leave.
• Other issues facing students (troubles at home, difficulties with adjustment to college, relationships, addictions, mental health concerns, financial challenges)

(Steele and White, 2019)
What Issues Are You Seeing?
RESPECT
Academic advisors honor the inherent value of all students. Advisors build positive relationships by understanding and appreciating students’ views and cultures, maintaining a student-centered approach and mindset, and treating students with sensitivity and fairness.

PROFESSIONALISM
Academic advisors act in accordance with the values of the profession of advising for the greater good of students, colleagues, institutions, and higher education in general.

INCLUSIVITY
Academic advisors respect, engage, and value a supportive culture for diverse populations. Advisors strive to create and support environments that consider the needs and perspectives of students, institutions, and colleagues through openness, acceptance, and equity.

EMPOWERMENT
Academic advisors motivate, encourage, and support students and the greater educational community to recognize their potential, meet challenges, and respect and express individuality.

COMMITMENT
Academic advisors value and are dedicated to excellence in all dimensions of student success. Advisors are committed to students, colleagues, institutions, and the profession through assessment, scholarly inquiry, lifelong learning, and professional development.

INTEGRITY
Academic advisors act intentionally in accordance with ethical and professional behavior developed through reflective practice. Advisors value honesty, transparency, and accountability to the student, institution, and the advising profession.

CARING
Academic advisors respond to and are accessible to others in ways that challenge, support, nurture, and teach. Advisors build relationships through empathetic listening and compassion for students, colleagues, and others.
Promoting Excellence in Academic Advising begins with:

- **A focus on student learning**
  - Student learning outcomes tied to mission
  - Assessment of those outcomes

- **Commitment to Excellence**
  - Institution-wide mission
  - Policy and procedures defined that support that mission
  - Inclusive of all stakeholders
Student Success & Equity

What is working in our students’ success?

For whom is it not working?

How do we ensure that those students receive what they need?
Technology has...

Increased Access
Continued Operations
Supported health and safety

Revealed inequities
Become overwhelming
Turned into the quick fix
Data Driven Decisions

- Disaggregate data by student groups
- Employ focus groups, pulse surveys to get data
- Identify leading and lagging indicators
- What stories are the data telling?
