An Overview of the Society's Eighteenth Annual Report (2014)

I want to highlight the vitality that members of the Society of Emeritus Professors and Retired Scholars (SEPRS) have shown in numerous academic, research, and service activities. For many of the UOG community – but not all – their awareness of professors emeriti and retired scholars is “out of sight, out of mind.” Yet this report demonstrates how retired faculty continue to help the University achieve its mission for our community and the region. You can locate specific faculty which are listed alphabetically, and in-time we plan to insert a “search-link” function so you can easily click on a name.

SEPRS has 53 current members, of whom half live on Guam (26) and half live off-island across the nation (27). Some of us show the affects of our age, yet 3/4ths (38) are active members who participate in the Society's quarterly meetings, donate to the University, or at least report their activities. In 2014, using IT teleconferencing video technology, we have had five (5) off-island members regularly join and participate in the Society's quarterly meetings held in Emeritus Hall on-island.

So what do these retirees do? Well nearly one-third of the members listed in this report **are teaching and mentoring university students**. For example at UOG that includes Filomena Contoria, George Kallingal, Lourdes Klitzke, and Milagros Moguel, and off-island take a look at Joyce McCauley. Half of the Society **are engaged in professional research, publishing, and performing as journal reviewers/editors**. On-island are people like Hiro Kurishina, Rebecca Stephenson, Kenneth Carriveau, and Donald Shuster; while off-island turn to see Charles Birkland, Leroy Heitz, Harley Manner and Roy Tsuda. All (100%) are actively working in community service organizations and providing leadership to the region (e.g., see Paul Callahan, Lawrence Kasperbauer, Sally Tsuda). Over one-third **continue to provide professional service to the UOG** (look up Robert and Cynthia Sajnovsky, Mary Spencer). I haven't listed everyone presented in this report. Since you're reading here – take a moment to scroll forward and skim on through ! You will see that the Society is a productive part of the University allowing retired professors and scholars to continue to contribute their expertise to the University and the world.

Leroy Heitz,
Professor Emeritus of Engineering

I was co-investigator with Dr. Khosrowpanah of WERI, University of Guam on a project that was funded by the US Geological Survey titled; “Improving the Pohnpei Island Water Distribution System Using Hydraulic Modeling and Geographic Information Systems.” In this project we developed a computerize water system model and Geographic Information System (GIS) for the Pohnpei Island water distribution system located in Pohnpei State, Federated States of Micronesia.

Heitz, L. F. and sh. Khosrowpanah, “Improving the Pohnpei Island Water Distribution System Using Hydraulic Modeling and Geographic Information Systems” University of Guam, Water and Environmental Research Institute of the Western Pacific (WERI), Technical Report No 148, March 2014, 50 pages.

I completed work on a Guam Water Works Authority and Military funded study that investigated Ground Water under the Direct Influence of Surface water on Guam. This study is commonly known as the Guam GWUDI study. I analyzed continuous water quality data and bacterial data for 21 wells located in Northern Guam. I previously submitted separate technical completion reports for the GWA and military portions of the project to WERI and this year submitted an updating report that contained the results of analysis of long term data for all of the wells. As a result of the data and analyses presented, all the wells on Guam were declared not under the direct influence of surface water. This new determination will quite likely save GWA and military rate payers millions in additional water rate increases in the future.

I was co-investigator with Dr. Khosrowpanah of WERI on a research project funded by the US Geological Survey in which we are evaluating the variability of streamflow in South Guam streams using Geographic Information Systems (GIS) technology. In November 2014, I made a trip to Guam to coordinated data acquisitions and analysis techniques that are being used in the study. I submitted a draft technical completion report for this project to WERI for publication. That publication is presently in press.

I am co-investigator with Dr. Khosrowpanah of WERI University of Guam on a training project proposal being submitted for funding by the US Geological Survey titled; “Review of Hydraulic Analysis Methods and Advanced Modeling Techniques Using the EPANET Water Distribution System model.” If funded, we will be presenting a three week training program to the Engineers at Saipan Commonwealth Utility Corporation (CUC) and the Commonwealth Department of Environmental Quality (DEQ). The training will begin with a refresher in fluid mechanics, detailed coverage of closed conduit hydraulics, and hydraulic aspects of pipe network analysis. The second phase of the training will involve hands on training for developing and applying a sophisticated water system model to real world data.

This past year, I continued my own professional development by sharpening my programming skills for use in “Windows 8” Modern User Interface software

development using Microsoft Visual Studio 2013. As a result, I am developing two Rain Catchment analysis package for Windows 8.1. These include one for South West Arizona and another for the Federated States of Micronesia and Saipan. I also added optimizing routines to my existing Windows Based rain catchment model and completed the development of a “Quick Sizer” program for rain catchment sizing in Micronesia along with a web site application using the Quick Sizer program as a template.

Daniel L. Robertson, Ph.D.

Professor Emeritus of English and Applied Linguistics

This year I have continued to work on developing my knowledge of Chinese language and culture, a pursuit which I began in 1966 in the USAF. I have enrolled in the Chinese School of Guam and am in the middle of 8th Grade. I have also arranged two study trips to Taiwan and China, one week each, 15 hours/week.

ACADEMIC CONTRIBUTIONS:

I have worked with the principal of the local Chinese school to improve the English language usage in teaching materials and communications of the school through editorial assistance.

In two trips to Sias International University in Zhengzhou, Henan, China, in May and in October, I have established contacts among the faculty and administration in pursuit of exchanges between our two universities.

RESEARCH AND PROFESSIONAL SCHOLARSHIP

I have established and maintained communication with a representative of the publishing company which provides the teaching materials to the local Chinese school, and we have met several times in Taiwan. To date, I have provided editorial reviews and suggested revisions for the first five books of the 10-book series.

SERVICE:

As mentioned above, I have provided expertise in English language editing to the local Chinese school throughout the year. In addition, I have participated in all of the activities of the school.

I have participated in the activities of the SPERS over the past year, and have attended the meetings of the Society.

In the course of my study trip to Sias International University in October, I pursued areas of mutual interest between Sias and UOG, with a view to facilitating exchanges of faculty, students and staff under the recently-agreed-upon MOU.

PHILANTHROPY:

I have made contributions in cash and in kind to the University, to the Chinese School of Guam, and to other charitable organizations on island.

I have established the Robertson Applied Linguistics Award with the UOG Endowment Foundation. This annual award recognizes excellence in academic work related to English language and applied linguistics.

SERVICE

Service to the Community

As a member of the Hawaii United Okinawa Association and the Okinawan

Genealogical Society of Hawaii (OGSH), service to the community included:

1. Provision of information and guidance to individuals who are conducting genealogy searches using a locally developed data base, immigration records, census records and genealogy text references;
2. Maintaining and expanding a bookmark project used to provide the public with information on the history of Ryukyu names and the changes in pronunciation as a result of Japan's control in government. The project currently holds 582 of the most common pre-1879 Ryukyu names; and
3. Serving on a 4-member team to Brazil, Bolivia and Peru to attend Okinawan immigrant celebrations and conferences and promote interest in international genealogy networking. The 20-day trip included conducting a genealogy session in Sao Paulo by myself and another OGS member with support and translations from English to Portuguese by the Okinawan Kenjin Do Brasil staff. In Campo Grande (Brazil), the 100th Immigration Celebrations were held which gave us opportunities to confer with presidents and officers of the respective Okinawan clubs. The Bolivia Okinawan immigrants celebrated their 60th anniversary, many with the Battle of Okinawa fresh in their memories. The 18th World Uchinanchu Business International and the 3rd Okinawan Kenjinkai World Conferences were held in Peru. Important networking contacts and activities were established.

Society of Emeritus Professors & Retired Scholars
Treasurer's Report for 2014

Introduction

The treasurer's report format has been revised to reflect changes in the *modus operandi* called for by the SEPRS membership in its regular meeting of March 11 and its special meeting of April 17, 2014. The SEPRS Officers invited the Asia Pacific Financial Management Group to submit a proposal for managing the Society's investment account within the UOG Foundation. Ms. Sandra McKeever, President & Financial Advisor, proposed an acceptable investment strategy and the proposal was approved in special meeting of April 17. The SEPRS members recommended in its next regular meeting that the UOG Endowment Foundation endorse the proposal and proceed with the plan.

As of November 2014, all financial resources of the Society of Emeritus Professors and Retired Scholars are invested in a single endowment account using the Raymond James Freedom ETF Balanced Strategy. This endowment fund underwrites each of Society's budget categories, i.e., the General Fund, the Scholarship Fund, and the Incubator Fund. Each budget category is allocated a quarterly allotment following prescribed mathematical formulae. This model is not new, but rather follows the practice of the UOG Foundation. What is new is that, for the first time in its existence, SEPRS will have a say in how the monies are invested and that its members can annually expect an estimated 6% return on investment in dividends. Table 1 displays the financial transactions of the endowment fund for the end of the calendar year.

Table 2 indicates the Society’s end-of-the-year fiscal status by budget category. The General Fund Account supports all day-to-day operations of the Society approved by its members. The Scholarship Fund Account will proffer at least one \$500.00 scholarship beginning in 2017. In three years, the Incubator Fund Account will provide seed money for collaborative ventures of SEPRS and other UOG programs.
